

NORTH TEXAS PRESSURE VESSELS INC

PRESSURE VESSELS FOR THE OIL, NATURAL GAS AND INDUSTRIAL MARKETS

940-327-0800

327 Travis Street
Mineral Wells, TX 76067
<http://www.ntpvinc.com>

The NTPV Fuel Gas Filter is designed to offer both solids and liquid removal using the **Jonell MicroLOK "G"™** Series Coalescing Filter Element. The NTPV design allows for the use of a single industry standard 312, 324 and 336 in the same housing allowing each user the ability to match their element / vessel to their specific process needs.

Equipped with the NTPV FENIKS Swing Bolt Closure for easy and reliable element access.

Vessels connections include:

2"-150# RF Inlet / Outlet

1/2" NPT Level Gauge, PDI & Vent

1" High Level Shut Down and Drain

Standard auxiliary packages are available upon request.

Elevation dimensions for major piping are 13" at the Inlet and 63" at the Outlet with a flange to flange dimension is 18 1/2".

Units are designed, manufactured code stamped to ASME Section VIII, Division 1, 2010 Edition, 2011 Addenda for 275 PSIG @ 100° F with a 1/16" corrosion allowance.
